1 [Intrusion detection and response: MET: an experimental system for Malicious Email Tracking](#) 50% Manasi Bhattacharyya , Shlomo Hershkop , Eleazar Eskin**Proceedings of the 2002 workshop on New security paradigms** September 2002

Despite the use of state of the art methods to protect against malicious programs, they continue to threaten and damage computer systems around the world. In this paper we present MET, the Malicious Email Tracking system, designed to automatically report statistics on the flow behavior of malicious software delivered via email attachments both at a local and global level. MET can help reduce the spread of malicious software worldwide, especially self-replicating viruses, as well as provide furth ...
